Colvendrame is the name of the hilly area where this vineyard is located. It has an excellent exposition to the sun and the climate is ideal for vine growing.

ALTITUDE: 200-350 m.

SOIL: it has the ideal structure for vine growing, with a high percentage of clay. It is particularly rich in tufa, which characterises the wine.

VINEYARD MANAGEMENT: to obtain a perfect ripening of the grapes, beyond the normal vineyard management, we carry out summer pruning. Furthermore, the yield is kept very low in order to produce grapes rich in body and aroma.

VINIFICATION: pressing of the entire grapes and at controlled temperature **SECOND FERMENTATION:** the second fermentation is carried out with the "Italian method" in pressured tanks.

TASTING CHARACTERISTICS: creamy, fine, and persistent perlage, straw yellow in color with greenish highlights. It offers a fresh bouquet of acacia blossoms, with delicate fruity notes of white peach and rennet apple, and a balanced and elegant finish.
